

ADDENDUM # 1
RFP #1 - 2007/2008
Replacement of Heating & Air Conditioning Units

After the walk through today and examining the units to be replaced, it was discovered that there are various sizes in the current wall units.

For quoting purpose, each unit should be priced individually and should be specific as to the size of the unit that will be replaced.

The units should not be replaced with smaller units than what is currently in place, especially the units in the Engineering and Building departments, since those offices are on the south side of the building.

The units to tentatively be replaced are as follows based on importance and funds available. The Town reserves the right to choose which units need to be replaced in order of importance.

Assessor's Office
Town Council Office
Small conference room
Town Manager's office
Building Inspector's Office
Town Engineer's Lobby
Town Engineer's Office
Fire Marshall's office

This addendum should be signed and submitted with your bid proposal.
