North Branford, CT 06471

Stormwater Program Permit Information

1. Permitting Authority: Connecticut Department of Environmental Protection	
2. Permit Number: 1	3. Permit Type: Not Applicable
4. Permit Name: Town of North Branford	
5. Date Issue: 1/9/2004	6. Date Expire: 1/8/2009

General Information for MS4 Operator

1. Operator Name:	Richard V. Branigan		
2. Operator Title:	Town Manager		
3. Represented Entity:	Town of North Branford		
4. Mailing Address:	909 Foxon Road P.O. Box 287		
5. Mail City, State, Zip:	North Branford, CT 06471		
6. Phone Number:	(203) 484-6000		
7. E-Mail Address:	townmanager@townofnorthbranfordct.com		
8. Co-Permitting With:			
9. Population: 14,000	Households: 4,000	Area (sq mi): 27	
10. Official Website:	www.townofnorthbranfordct.com		

General Information for Primary Contact Person

1. Name:	Kurt A. Weiss, P.E.
2. Title:	Town Engineer
3. Phone Number	(203) 484-6009
4. E-Mail Address:	townengineer@townofnorthbranfordct.com

General Information for Secondary Contact Person

1. Name:	Fran Merola
2. Title:	Director of Public Works
3. Phone Number	(203) 484-6060
4. E-Mail Address:	

General Information for Receiving Waters

Receiving Water Lists: Listed below are all the identified receiving waterbodies to which identified outfalls discharge.

Receiving Streams (creek, stream, river, etc.)	Receiving Waterbodies (lake, wetland, ocean, etc.)	Receiving Watersheds
		Coginchaug River- Drainage Basin #4607 West River-Draainage basin #5110 Branford River -Drainage basin #5111 Farm River -Drainage Basin #5112 Muddy River -Drainage Basin #5208

Section B

Plan Contents Summary

The Stormwater Management Plan consists of the following Minimum Control Measures and BMPs:

Minimum Control Measures and BMPs		
Public Participation/Involvement		
Community Clean-ups		
	10/1/2004	7/7/2006
Establish a Citizen panel		
	1/3/2005	1/3/2005
Finalize Citizen Panel Recommendations		
	1/2/2006	1/5/2007
Public Meetings - Print Media		
	8/2/2004	10/6/2006
Public Education and Outreach		
Develop educational resources		
	9/5/2004	9/5/2007
Expand educational resources		
	1/2/2006	12/30/2007
HazWaste Central		
	1/1/2004	12/30/2004
Storm Drain Stenciling		
	9/5/2004	1/1/2007
Illicit Discharge Detection and Elimination		
Continuation of Detection and Elimination Efforts		
	1/1/2008	6/5/2004
Detection and Elimination		
	10/2/2006	10/5/2007
Initial Identification of Illicit Discharge Sources		
	10/4/2004	6/5/2004
Sewer System Map		
	7/1/2004	1/2/2009
Stormwater Ordinance		
	6/4/2007	6/5/2008
Train Employees		
	7/1/2005	7/1/2006
Pollution Prevention/Good Housekeeping		
Develop Pollution Prevention Plan		
	6/4/2004	7/2/2006
Employee Training Materials		
	7/1/2004	7/1/2005
Incorporation of BMPs in Master Plan		
	7/1/2005	7/2/2007

Information Management System		
	7/1/2004	7/3/2006
Maintenance Program Effectiveness		
	7/2/2007	1/1/2009
Maintenance Schedule		
	7/1/2005	7/2/2007
Municipal Management Plan		
	1/2/2006	10/13/2006
Train Employees		
	7/1/2005	7/2/2007
Construction Site Runoff Control		
Begin Inspection Program		
	1/2/2006	7/2/2007
Information Management System in Place		
	7/1/2005	7/2/2007
Maximum Compliance		
	1/2/2006	1/1/2009
Ordinance / Regulatory Mechanism		
	7/1/2004	1/2/2006
Staff Training		
	7/1/2005	7/2/2007
Post-Construction Runoff Control		
Identification of BMPs		
	7/1/2004	7/3/2006
Publication of BMPs		
	7/1/2005	7/3/2007

Section C

Public Participation/Involvement

Descriptive Text:

To satisfy this minimum control measure, the Town will:

1. Comply with applicable State and local public notice requirements and Freedom of Information requirements; and
2. Determine the appropriate best management practices (BMPs) and measurable goals for this minimum control measure.

EPA believes that the public can provide valuable input and assistance to a regulated small MS4's municipal storm water management program and, therefore, suggests that the public be given opportunities to play an active role in both the development and implementation of the program. An active and involved community is crucial to the success of a storm water management program because it allows for:

1. Broader public support since citizens who participate in the development and decision making process are partially responsible for the program and, therefore, may be less likely to raise legal challenges to the program and more likely to take an active role in its implementation;
2. Shorter implementation schedules due to fewer obstacles in the form of public and legal challenges and increased sources in the form of citizen volunteers;
3. A broader base of expertise and economic benefits since the community can be a valuable, and free, intellectual resource; and
4. A conduit to other programs as citizens involved in the storm water program development process provide important cross-connections and relationships with other community and government programs. This benefit is particularly valuable when trying to implement a storm water program on a watershed basis, as encouraged by EPA.

Number of BMPs associated with control measure:

4

Important Dates:

Earliest Start Date: 8/2/2004

End Date: 1/5/2007

Details of BMPs and Work Performed for Them

Community Clean-ups

Responsible Party: Karl Kilduff, Town Manager

Start Date: 10/1/2004

End Date: 7/7/2006

Permits Years during which activities are scheduled:

Year 1	Year 2 X	Year 3	Year 4	Year 5
--------	-----------------	--------	--------	--------

Name of Separate Implementing Entity:

Not Applicable

BMP Description:

Using volunteers for water quality monitoring will give citizens first-hand knowledge of the quality of local water bodies and provide a cost-effective means of collecting water quality data.

Involve a certain percentage of the community through this organization to help in community clean-ups.

Has Goal Been Accomplished: YES

Work Performed

Date: 8/1/2005

Responsible Party: Kurt Weiss, Town Engineer

2005 Farm River Clean-up

In August 2005, residents of Circle Drive conducted a clean-up of the Branford River and Munger Brook which run through their neighborhood. Residents removed debris, litter and brush which was collected by the Public Works Department.

Date: 4/4/2005

Responsible Party: Karl Kilduff, Town Manager

2005 Recycling Days

In 2005, 124 households participated in the Town's recycling program which produced the following quantities:

Waste oil 2305 gals

Metals 45.43 tons

Leaves 107 tons, 410 vehicles

Electronics recycling-90 residents participated in a regional collection day.

In 2005, the Town participated in American Recycling Day and Connecticut Recycling Day.

Date: 1/2/2006

Responsible Party: Karl Kilduff, Town Manager

2006 Recycling Days

In 2006, 112 households participated in the Town's recycling day. In addition, the North Branford residents participated in American Recycling Day and Connecticut Recycling Day.

Recycling effortsthroughout the year resulted in the following collection totals:

Waste oil: 2,570 gals

Metals: 65 tons

Leaf Collection: 20 tons (fall collection totals), 407 vehicles

Electronics recycling: 76 residents participated in a regional collection day.

Date: 4/2/2007	Responsible Party: Karl Kilduff, Town Manager			
<p>2007 Recycling Days In 2007, 109 households participated in theTown's 2 recycling days. Recycling efforts throughout the year resulted in the following collection totals:</p> <p>Waste oil: 2,149 gals</p> <p>Metals: 5.76 tons</p> <p>Leaf Collection: 408 vehicles participated in the fall collection program.</p> <p>Electronics recycling: 60 residents participated in a regional collection day.</p>				
Date: 1/1/2008	Responsible Party: Michelle Knockwood, Risk Manager			
<p>2008 Recycling Days In 2008, 709 households participated in theTown's 2 recycling days. Recycling efforts throughout the year resulted in the following collection totals:</p> <p>Waste oil: 1838 gals</p> <p>Metals: 19.74 tons</p> <p>Leaf Collection: 354 vehicles participated in the fall collection program.</p> <p>Electronics recycling: 35 residents participated in a regional collection day.</p>				
Date: 1/1/2004	Responsible Party: Karl Kilduff, Town Manager			
<p>Recycling Days During the year, 206 residents participated in the recycling program which produced the following quantities:</p> <p>Waste oil 2582 gals</p> <p>Metals 32.7 tons</p> <p>Leaves 97.5 tons</p> <p>Electronics recycling-26 residents participated in a regional collection day.</p> <p>In 2004, the Town participated in American Recycling Day and Connecticut Recycling Day.</p>				
Date: 11/1/2004	Responsible Party: Al Perry, Civil Engineering Technician			
<p>Regional Teaming-RWA Discussed the potential for Town residents participating in the RWA's annual stream clean-up project. Agreed to continue discussion with RWA and select potential clean-up locations.</p>				
Establish a Citizen panel				
Responsible Party: Karl Kilduff, Town Manager				
Start Date: 1/3/2005	End Date: 1/3/2005			
Permits Years during which activities are scheduled:				
Year 1 X	Year 2 X	Year 3	Year 4	Year 5
Name of Separate Implementing Entity:				

Not Applicable				
BMP Description: Use this panel for citizen discussion of various viewpoints and provide input concerning appropriate storm water management policies and BMPs.				
Create a citizen panel that will be used to discuss and come up with plans for different storm water issues.				
Has Goal Been Accomplished: YES				
Work Performed				
Date: 5/9/2005	Responsible Party: Karl Kilduff, Town Manager			
2005 Citizens Panel In 2005, the Town's Recycling and HazWaste Committee was selected as the Citizen's Panel. 2 meetings were held in 2005. See 2005 Citizens panel recommendations for issues discussed.				
Date: 1/2/2006	Responsible Party: Karl Kilduff, Town Manager			
2006 Citizens Panel In 2006, the Town's Recycling and HazWaste Committee held 3 meetings. See 2006 Citizens panel recommendations for issues discussed.				
Date: 1/12/2007	Responsible Party: Karl Kilduff, Town Manager			
2007 Citizens panel In 2007, the Town's Recycling and HazWaste Committee held 4 meetings. See 2007 Citizens panel recommendations for issues discussed.				
Date: 1/1/2008	Responsible Party: Richard Branigan, Town Manager			
2008 Citizens Panel In 2008, the Town's Recycling and HazWaste Committee held 4 meetings. See 2008 Citizens panel recommendations for issues discussed.				
Date: 11/17/2004	Responsible Party: Kurt Weiss, Town Engineer			
Recycling and HazWaste Committee Evaluated the use the Town's existing committee as a vehicle to promote community involvement in the MS4 program. The committee currently acts as liaison with the RWA's HazWaste program and is responsible for Town recycling efforts.				
Finalize Citizen Panel Recommendations				
Responsible Party: Karl Kilduff, Town Manager				
Start Date: 1/2/2006	End Date: 1/5/2007			
Permits Years during which activities are scheduled:				
Year 1	Year 2 X	Year 3 X	Year 4	Year 5
Name of Separate Implementing Entity: Not Applicable				
BMP Description: Use this panel for citizen discussion of various viewpoints and provide input concerning appropriate storm water management policies and BMPs.				
Finalize recommendations from citizen panel and publish the results.				
Has Goal Been Accomplished: YES				
Work Performed				
Date: 2/14/2005	Responsible Party: Karl Kilduff, Town Manager			
2005 Citizens Panel Recommendations In 2005, the following Issues were discussed by the committee:				

Ran "After the Storm" video on public access TV station
 Reviewed Draft Ordinances
 Reviewed BMP's
 Approved Catch Basin Stenciling
 Reviewed street sweeping policies
 Reviewed recycling efforts and quantities collected
 Discussed how to better distribute brochures and educational materials
 Discussed the redesign of the Town's web site to include stormwater materials

Recommendations from the citizen panel will be finalized and published.

Date: 1/2/2006	Responsible Party: Karl Kilduff, Town Manager
----------------	---

2006 Citizen Panel Recommendations

In 2006, the following Issues were discussed by the committee:

Discussed continued running of "After the Storm" video on public access TV station.

Approved the use of Ice Ban an environmentally safe agricultural byproduct to enhance the performance of rock salt.

Also discuss running a recycling video on the Town's education channel

Continued review of Stormwater Draft Ordinances

Discussed adding stormwater materials to newcomers welcoming package

Added Town street sweeping policies to web site

Reviewed recycling efforts and quantities collected

Reviewed CTDEP's regs regarding separation of items from from solid waste stream. The Town will voluntarily add plastic containers #1 & #2 to its recycling efforts.

Added stormwater materials to the Town's web site

Date: 12/19/2007	Responsible Party: Karl Kilduff, Town Manager
------------------	---

2007 Citizens panel Recommendations

In 2007, the following Issues were discussed or approved by the committee:

Approved the continued use of Ice Ban an environmentally safe agricultural byproduct to enhance the performance of rock salt.

Began running a recycling video on the Town's education channel

Added stormwater materials to newcomers welcoming package

Reviewed recycling efforts and quantities collected and discussed to increase community involvement.

The Town voluntarily added plastic containers #1 & #2 to its recycling efforts.

Date: 12/10/2008	Responsible Party: Richard Branigan, Town Manager
------------------	---

2008 Citizens Panel Recommendations

In 2008, the following Issues were discussed or approved by the committee:

Ran a recycling video on the Town's education channel

Continued to include stormwater materials to newcommers welcoming package.

Reviewed recycling efforts and quantities collected and discused to increase community involvement.

Discussed methods of reaching a greater numbers of the public about the impacts of storm water discharges on local waterbodies through outreach activities.

Public Meetings - Print Media

Responsible Party: Karl Kilduff, Town Manager

Start Date: 8/2/2004

End Date: 10/6/2006

Permits Years during which activities are scheduled:

Year 1 **X** Year 2 **X** Year 3 Year 4 Year 5

Name of Separate Implementing Entity:

Not Applicable

BMP Description:

Notify citizens of public meetings in several different print media.

Has Goal Been Accomplished: YES

Work Performed

Date: 1/3/2005

Responsible Party: Kurt Weiss, Town Engineer

2005 Meetings

Using Town's HazWaste Recycling Committee to facilitate public meetings about our MS4 program. 2 meetings were held in 2005. Public notifications were placed on the Town's web site and in local and regional newspapers.

On September 17, 2005 the Committee placed an article in the Totoket Times describing the Town's Stormwater Management Program.

Article written in the Shoreline Sound on November 10, 2005 describing how North Branford High School students participated in stenciling catch basins as part of a science program.

North Branford teacher was one of 16 science teachers recognized for teaching conserns about water resources and the environment. Article published in NH Register on September 1, 2005.

25 Recycling/HazWaste articles were placed in the Totoket Times and Sound newspapers.

Date: 1/2/2006

Responsible Party: Al Perry, Civil Engineering Technician

2006 Meetings

Continued using the Town's HazWaste Recycling Committee to facilitate public meetings about our MS4 program. 3 meetings were held in 2006. Public notifications were placed on the Town's web site and in local and regional newspapers.

An article was placed in the Totoket Times and the Shoreline Sound on December 21, 2006 describing how the Town of North Branford will be using Ice Ban an environmentally safe agricultural byproduct to enhance the performance of rock salt. We anticipate using less salt and sand and lower costs associated with repeat applications.

25 Recycling/HazWaste articles were placed in the Totoket Times and Sound newspapers.

Date: 1/2/2007	Responsible Party: Al Perry, Civil Engineering Technician
<p>2007 Meetings</p> <p>Continued using the Town's HazWaste Recycling Committee to facilitate public meetings about our MS4 program. 4 meetings were held in 2007. Public notifications were placed on the Town's web site and in local and regional newspapers.</p> <p>Articles were placed in the Totoket Times and the Shoreline Sound in December, 2007 describing how the Town of North Branford will continue using Ice Ban an environmentally safe agricultural byproduct to enhance the performance of rock salt. We anticipate using less salt and sand and lower costs associated with repeat applications.</p> <p>32 Recycling/HazWaste articles were placed in the Totoket Times and Sound newspapers. 15,000 Recycling/Trash information cards were also included in home deliveries of the Totoket Times.</p> <p>20,000 "don't Trash Your Cash" brochures were inserted with property tax bills.</p>	
Date: 1/1/2008	Responsible Party: Al Perry, Civil Engineering Technician

Public Education and Outreach

Descriptive Text:

To satisfy this minimum control measure, the Town will:

1. Implement a public education program to distribute educational materials to the community, or conduct equivalent outreach activities about the impacts of storm water discharges on local waterbodies and the steps that can be taken to reduce storm water pollution; and
2. Determine the appropriate best management practices (BMPs) and measurable goals for this minimum control measure.

An informed and knowledgeable community is crucial to the success of a storm water management program since it helps to ensure the following:

1. Greater support for the program as the public gains a greater understanding of the reasons why it is necessary and important. Public support is particularly beneficial when operators of small MS4s attempt to institute new funding initiatives for the program or seek volunteers to help implement the program; and
2. Greater compliance with the program as the public becomes aware of the personal responsibilities expected of them and others in the community, including the individual actions they can take to protect or improve the quality of area waters.

Number of BMPs associated with control measure:

4

Important Dates:

Earliest Start Date: 1/1/2004

End Date: 12/30/2007

Details of BMPs and Work Performed for Them

Develop educational resources

Responsible Party: Kurt Weiss, Town Engineer

Start Date: 9/5/2004

End Date: 9/5/2007

Permits Years during which activities are scheduled:

Year 1 **X** Year 2 **X** Year 3 **X** Year 4 Year 5

Name of Separate Implementing Entity:

Not Applicable

BMP Description:

Develop an infra-structure resource to support the public education and outreach program.

Develop brochures to support the Public Meetings - Print Media Goal in the Public Participation and Involvement Minimum Control Measure.

Create a storm water hotline for information and for citizen reports on polluters.

Identify and train volunteer educators to be used for a Public Education Task Force.

Has Goal Been Accomplished: YES

Work Performed

Date: 1/3/2005

Responsible Party: Al Perry, Civil Engineering Technician

2005 Brochures

In 2005, the following brochures, fact sheets and pamphlet resources (EPA, DEP, RWA, HazWaste, etc.) were placed in Town Hall (Building, Engineering, Lobby), Town Libraries, Recycling and other municipal buildings.

55 After the Storm brochures were distributed

70 Step by Step brochures were distributed

35 Make Your Home The Solution to Stormwater Pollution brochures distributed

6000 recycling flyers delivered with local newspaper.

14,218 "Don't trash your cash" brochures were inserted in tax bills

5 HazWaste ads placed in regional newspaper.

6 recycling ads placed in local newspaper.

25 East Shore Health District brochures distributed in Town Hall.

170 erosion control fact sheets were distributed with building permit applications in 2005.

60 HazWaste brochures distributed.

Date: 9/12/2005

Responsible Party: Al Perry, Civil Engineering Technician

2005 Videos

In 2005, obtained a copy of the "After the Storm" video to run on the Town's public access station.

Also obtained a copy of the "preventing Stormwater Pollution-What we can do" video which was used to train Public Works staff.

Date: 1/3/2005 Responsible Party: Karl Kilduff, Town Manager

2005 Whitney Water Center

In 2005, approximately 200 elementary and junior high school students participate in the RWA's Whitney Water Center's summer school educational program. This year the subject matter was related to the water cycle.

The Discussed the possibility of the creation of a stormwater education program that will include basic education as well as storm drain stenciling. The Whitney Water Center anticipated that the program would be in place in the latter half of 2006.

Date: 1/2/2006 Responsible Party: Al Perry, Civil Engineering Technician

2006 Brochures

In 2006, the following brochures, fact sheets and pamphlet resources (EPA, DEP, RWA, HazWaste, etc.) were placed in Town Hall (Building, Engineering, Lobby), Town Libraries, Recycling and other municipal buildings.

21 After the Storm brochures were distributed

9 Step by Step brochures were distributed

17 Make Your Home The Solution to Stormwater Pollution brochures distributed

7 Septic Care Maintenance for Homeowners were distributed

6,600 recycling flyers delivered with local newspaper.

Approximately 14,000 "Don't trash your cash" brochures were inserted in tax bills

27 HazWaste and Recycling articles were placed in local and regional newspapers.

10 placed in local newspaper.

12 East Shore Health District brochures distributed in Town Hall.

164 erosion control fact sheets were distributed with building permit applications in 2006.

23 HazWaste brochures distributed.

Date: 1/2/2006 Responsible Party: Al Perry, Civil Engineering Technician

2006 Videos

In 2006, ran "After the Storm" video on the Town's public access station.

A recycling video featuring Town elementary school children was run on the Town's educational channel

Date: 1/2/2006 Responsible Party: Karl Kilduff, Town Manager

2006 Whitney Water Center

2006 Whitney Water Center Program

North Branford School Programs - 50 students from Stanley T. Williams attended a Watershed Walk

Library Programs:

Bubbleology 50
 Polar Opposites (polarity of a water molecule) 25
 Rainstick (making a rainstick) 25
 Water Art 25
 Chromatography Garden 25

North Branford Women's Club annual walk-a-thon around the RWA's Lake Gaillard. 75 walkers attended in 2006. The walk includes discussions about watersheds, trap rock ridges and the plants and animals found in the area.

Date: 1/2/2007	Responsible Party: Al Perry, Civil Engineering Technician
----------------	---

2007 Brochures
 In 2007, the following brochures, fact sheets and pamphlet resources (EPA, DEP, RWA, ESHD) were placed in Town Hall (Building, Engineering, Lobby), Town Libraries, Recycling and other municipal buildings.

- 15 After the Storm brochures were distributed
- 11 Step by Step brochures were distributed
- 7 Make Your Home The Solution to Stormwater Pollution brochures distributed
- 21 Septic Care Maintenance for Homeowners were distributed
- 12 East Shore Health District brochures distributed in Town Hall.
- 164 erosion control fact sheets were distributed with building permit applications.

Date: 6/3/2007	Responsible Party: Al Perry, Civil Engineering Technician
----------------	---

2007 Videos
 In 2007, a recycling video featuring Town elementary school children was run on the Town's educational channel.

Date: 3/5/2007	Responsible Party: Karl Kilduff, Town Manager
----------------	---

2007 Whitney Water Center
 In 2007, a total of 300 children in classes at Atwater Memorial Library. Classes included: Oozing Oobleck, Water Art, Polar Opposites, and Chromatography Garden (all dealing with the properties of water), Rainstick (making a tube that makes the sound of rain), Bubbles, and Distribution Solution (laying out a model of a distribution system).

Kids Connection had three programs for a total of 60 children - Water in My Community (how people in the community use water), Distribution Solution and Rainstick.

Stanley T. Williams had two classes for a total of 50 children to the Water Center for a Watershed Walk.

Date: 1/1/2008	Responsible Party:
----------------	--------------------

2008 Brochures
 In 2008, the following brochures, fact sheets and pamphlet resources (EPA, DEP, RWA, ESHD) were placed in Town Hall (Building, Engineering, Lobby), Town Libraries, Recycling and other municipal

buildings.	
3 After the Storm brochures were distributed	
5 Step by Step brochures were distributed	
2 Make Your Home The Sollution to Stormwater Pollution brochures distributed	
13 Septic Care Maintenance for Homeownerswere distributed	
7 East Shore Health District brochures distributed in Town Hall.	
56 Construction Site Stormwater Runnoff Control fact sheets were distributed with building permit applications.	
Date: 1/1/2008	Responsible Party: Al Perry, Civil Engineering Technician
2008 Videos in 2008, a recycling video featuring Town elementary school children was run on the Town's educational channel.	
Date: 1/1/2008	Responsible Party: Richard Branigan, Town Manager
2008 Whitney Water Center In 2008, a total of 478 children in classes at Atwater Memorial Library. Classes included: Oozing Oobleck, Water Art, Polar Opposites, and Chromatography Garden (all dealing with the properties of water), Rainstick (making a tube that makes the sound of rain), Bubbles, and Distribution Solution (laying out a model of a distribution system).	
Date: 10/11/2004	Responsible Party: Al Perry, Civil Engineering Technician
Brochures Collected a variety of brochures, fact sheets and pamphlet resources (EPA, DEP, RWA, HazWaste, etc.) and placed in Town Hall and other municipal buildings.	
DEP Construction Site poster placed in Building Dept.	
6000 recycling flyers delivered with local newspaper.	
5 HazWaste ads placed in regional newspaper.	
6 recycling ads placed in local newspaper.	
25 East Shore Health District brochures distributed in Town Hall.	
Erosion control fact sheet developed in 2004 and will be disistributed with all building permit applications in 2005.	
50 HazWaste brochures distributed.	
200 HazWaste pencils distributed.	
200 HasWaste magnets distributed.	
Date: 12/1/2004	Responsible Party: Al Perry, Civil Engineering Technician
Videos Evaluated educational videos from the EPA and other environmental agencies. To be made available	

to the Town's school system and run on the Town's public access television system.

Date: 1/28/2004 Responsible Party: Karl Kilduff, Town Manager

Whitney Water Center-RWA

On an annual basis approximately 300 elementary and junior high school students participate in the RWA's Whitney Water Center's educational program. Programs attended included the following subject matter:

- The Water Cycle
- Watersheds
- Habitats of LI Sound
- Food Chains and Webs of LI Sound
- Troubled Waters
- The Problem with Pollution
- From the Ground Up

Expand educational resources

Responsible Party: Kurt Weiss, Town Engineer

Start Date: 1/2/2006 End Date: 12/30/2007

Permits Years during which activities are scheduled:

Year 1 Year 2 Year 3 **X** Year 4 **X** Year 5

Name of Separate Implementing Entity:
Not Applicable

BMP Description:
This goal is for developing infra-structure resource to support your public education and outreach program.

Create an informational web site that describes your city, storm water issues, etc.

Develop a school curricula that can be used to educate students about storm water issues.

Has Goal Been Accomplished: YES

Work Performed

Date: 1/2/2007 Responsible Party: Karl Kilduff, Town Manager

2007 School System
Water Cycle Science Curricula K-12 (2007-2008)

Grade 2
Physical Science - Changes
9 classes - 186 students in total

Grade 4
Land and Water
8 classes - 187 students in total

Grade 6
Units 5-10:
Ecosystems, Exploring Natural Ecosystems, Weather and Climate, Earth's Atmosphere, Environmental Changes
8 classes - 191 students in total

Grades 11 & 12

<p>Environmental Issues 2 classes - 50 students in total</p> <p>Marine Biology 2 classes - 50 students in total</p> <p>Project Search (a component & conjunction with Marine Biology Environmental Issues) Classes will work with the EPA: studying, testing and an overall rating of the health of the Farm River. 2 classes - 50 students in total</p>	
Date: 9/4/2005	Responsible Party: Karl Kilduff, Town Manager
<p>2005 School System In 2005, 616 grade 2 through 6 students attended Physical Science-Ecosystems and Environmental studies.</p> <p>25 High School students attended Earth Science classes.</p>	
Date: 11/1/2005	Responsible Party: Al Perry, Civil Engineering Technician
<p>2005 Web Site In 2005, an RFP for the redesign of the Town's web site was advertised. 12 responses were received and are currently being evaluated.</p> <p>Future additions to the redesigned web site will include the Town of North Branford's Stormwater Management Plan, Zoning Regulations which include updated erosion control requirements, fact sheets, brochures and stormwater ordinances.</p>	
Date: 1/2/2006	Responsible Party: Karl Kilduff, Town Manager
<p>2006 School System Water Cycle Science Curricula K-12 (2006-2007)</p> <p>Grade 2 Physical Science - Changes 9 classes - 204 students</p> <p>Grade 4 Land and Water 9 classes - 220 students</p> <p>Grade 6 Units 5-10: Ecosystems, Exploring Natural Ecosystems, Weather and Climate, Earth's Atmosphere, Environmental Changes 8 classes - 199 students</p> <p>Grades 11 & 12 Environmental Issues 1 class 20-25 students Marine Biology 1 class 20-25 students Project Search (a component of Marine Biology and Environmental Issues) Classes will work with the EPA: studying, testing and developing an overall rating system of the health of the Farm River. 2 classes 20-25 students</p> <p>Elementary school children participated in the production of a recycling video which will be run on the Town's education channel.</p>	

Date: 3/5/2006	Responsible Party: Al Perry, Civil Engineering Technician
<p>2006 Web Site The Town's redesigned web site was unveiled in August 2006.</p> <p>Items posted included: Town of North Branford's Stormwater Management Plan, Zoning Regulations which include updated erosion control requirements and erosion control fact sheets.</p> <p>Future additions will include brochures and stormwater ordinances.</p>	
Date: 9/2/2007	Responsible Party: Al Perry, Civil Engineering Technician
<p>2007 Web Site Posted the Towns Illicit Discharges and Illegal Connection Ordinance, adopted 8/7/2007, on the Town's web site.</p>	
Date: 1/1/2008	Responsible Party: Richard Branigan, Town Manager
<p>2008 School System Water Cycle Science Curricula K-12 (2008-2009)</p> <p>Grade 2 Physical Science - Changes 8 classes - 169 students in total</p> <p>Grade 4 Land and Water 8 classes - 193 students in total</p> <p>Grade 6 Units 5-10: Ecosystems, Exploring Natural Ecosystems, Weather and Climate, Earth's Atmosphere, Environmental Changes 8 classes - 232 students in total</p> <p>Grades 11 & 12 Environmental Issues 2 classes - 41 students in total Marine Biology 2 classes - 40 students in total Project Search (a component & conjunction with Marine Biology Environmental Issues) Classes will work with the EPA: studying, testing and an overall rating of the health of the Farm River. 2 classes - 41 students in total</p>	
Date: 1/1/2008	Responsible Party: Al Perry, Civil Engineering Technician
<p>2008 Web Site Posted the Towns Illicit Discharges and Illegal Connection Ordinance, adopted 8/7/2007, on the Town's web site.</p> <p>A copy of the Construction Site Stormwater Runoff Control fact sheet was placed on the Town web site.</p>	
Date: 9/1/2004	Responsible Party: Kurt Weiss, Town Engineer
<p>School System Utilize current science programs at the high school, intermediate and elementary school levels to incorporate stormwater management practices in order to increase awareness and knowledge to school aged students. Current programs included the following class work in 2004:</p>	

High School: Ecosystems, Water Pollution & Toxic Waste-40 students

Intermediate School: Ecosystems & Environmental Changes-218 students

Elementary School, Grade 4: Ecosystems-200 students

Grade 4: Earth Science-200 students

Date: 10/6/2004

Responsible Party: Karl Kilduff, Town Manager

Web Site

Posted notice on the Town's web site describing the MS4 permit and the Town's responsibilities for compliance.

Created links to the EPA ,CT DEP and NEMO web sites.

Added link to RWA's HazWaste Central web-page on Town web site.

Future additions to the web site will include the Town of North Branford's Stormwater Management Plan, Zoning Regulations which include updated erosion control requirements, fact sheets, brochures and stormwater ordinances.

HazWaste Central

Responsible Party: Karl Kilduff, Town Manager

Start Date: 1/1/2004

End Date: 12/30/2004

Permits Years during which activities are scheduled:

Year 1 **X**

Year 2

Year 3

Year 4

Year 5

Name of Separate Implementing Entity:

HazWaste Central

BMP Description:

Encourage Town residents to use of the RWA's HazWaste Central waste collection program.

In 2004, 23 collection dates for Town residents were held.

A total of 241 residents participated.

Has Goal Been Accomplished: YES

Work Performed

Date: 5/9/2005

Responsible Party: Karl Kilduff, Town Manager

2005 Collections

In 2005, 26 collection dates for Town residents were held.

A total of 331 households participated.

Date: 1/2/2006

Responsible Party: Karl Kilduff, Town Manager

2006 Collections

In 2006, 22 regional collection dates were held including 2 Hometown collection days.

A total of 238 North Branford households participated.

Date: 4/2/2007

Responsible Party: Karl Kilduff, Town Manager

2007 Collections

In 2007, 2 HazWaste Hometown collection days were held. A total of 242 North Branford households participated.

Date: 1/1/2008 Responsible Party: Richard Branigan, Town Manager

2008 Collections
 In 2008, 22 HazWaste Hometown collection days were held. A total of 353 North Branford households participated.

Storm Drain Stenciling

Responsible Party: Karl Kilduff, Town Manager

Start Date: 9/5/2004 End Date: 1/1/2007

Permits Years during which activities are scheduled:

Year 1 X Year 2 X Year 3 X Year 4 Year 5

Name of Separate Implementing Entity:
 Not Applicable

BMP Description:
 Stencil storm drains with messages like "Do Not Dump - Drains to Waterways and Long Island Sound", etc.

Has Goal Been Accomplished: NO

Work Performed

Date: 9/18/2005 Responsible Party: Fran Merola, Director of Public Works

2005 Stenciling
 In 2005, 522 catch basins were stenciled by Pubilc Works staff and North Branford high school students.
 To date, 678 out of approximately 2,000 catch basins have been stenciled.

Date: 1/2/2006 Responsible Party: Fran Merola, Director of Public Works

2006 Stenciling
 In 2006, 4 catch basins were stenciled by Pubilc Works staff.
 To date, 682 out of approximately 2,000 catch basins have been stenciled.

Date: 1/2/2007 Responsible Party: Fran Merola, Director of Public Works

2007 Stenciling
 No catch basins were stenciled by Pubilc Works staff in 2007.
 To date, 682 out of approximately 2,200 catch basins have been stenciled.

Date: 1/1/2008 Responsible Party: Fran Merola, Director of Public Works

2008 Stenciling
 No catch basins were stenciled by Pubilc Works staff in 2008.
 To date, 682 out of approximately 2,200 catch basins have been stenciled.

Date: 5/10/2004 Responsible Party: Fran Merola, Director of Public Works

Pilot Program
 The Public Works Department began a pilot stenciling program with our local boy scout troupe in 2004. 156 out of a total of approximately 2,000 catch basins were stenciled in 2004.

Illicit Discharge Detection and Elimination

Descriptive Text:

Recognizing the adverse effects illicit discharges can have on receiving waters, the final rule requires the Town to develop, implement and enforce an illicit discharge detection and elimination program. This program will include the following:

1. A storm sewer system map, showing the location of all outfalls and the names and location of all waters of the Town that receive discharges from those outfalls;
2. Through an ordinance, or other regulatory mechanism, a prohibition (to the extent allowable under State or local law) on non-storm water discharges into the MS4, and appropriate enforcement procedures and actions;
3. A plan to detect and address non-storm water discharges, including illegal dumping, into the MS4;
4. The education of public employees, businesses, and the general public about the hazards associated with illegal discharges and improper disposal of waste; and
5. The determination of appropriate best management practices (BMPs) and measurable goals for this minimum control measure.

Discharges from MS4s often include wastes and wastewater from non-storm water sources. A study conducted in 1987 in Sacramento, California, found that almost one-half of the water discharged from a local MS4 was not directly attributable to precipitation runoff. A significant portion of these dry weather flows were from illicit and/or inappropriate discharges and connections to the MS4. Illicit discharges enter the system through either direct connections (e.g., wastewater piping either mistakenly or deliberately connected to the storm drains) or indirect connections (e.g., infiltration into the MS4 from cracked sanitary systems, spills collected by drain outlets, or paint or used oil dumped directly into a drain). The result is untreated discharges that contribute high levels of pollutants, including heavy metals, toxics, oil and grease, solvents, nutrients, viruses, and bacteria to receiving waterbodies. Pollutant levels from these illicit discharges have been shown in EPA studies to be high enough to significantly degrade receiving water quality and threaten aquatic, wildlife, and human health.

Number of BMPs associated with control measure:

6

Important Dates:

Earliest Start Date: 7/1/2004

End Date: 1/2/2009

Details of BMPs and Work Performed for Them

Continuation of Detection and Elimination Efforts

Responsible Party: Kurt Weiss, Town Engineer				
Start Date: 1/1/2008		End Date: 6/5/2004		
Permits Years during which activities are scheduled:				
Year 1	Year 2	Year 3	Year 4 X	Year 5
Name of Separate Implementing Entity: Not Applicable				
BMP Description: Building on the work begun in the year 3 goal 'Detection and Elimination' efforts will continue so that by years end most illicit discharges will have been detected and eliminated.				
Has Goal Been Accomplished: NO				

Work Performed

Date: 1/2/2006	Responsible Party: Kurt Weiss, Town Engineer			
2006 Continued Detection and Elimination In 2006, the RWA, East Shore Health District and North Branford Public Works Department worked together to inspect, identify and correct illicit discharges, if required.				
Date: 1/2/2007	Responsible Party: Kurt Weiss, Town Engineer			
2007 Continued Detection and Elimination The North Branford Public Works Department, RWA and East Shore Health District continue to work together to inspect, identify and correct illicit discharges, if required.				
Date: 1/1/2008	Responsible Party: Kurt Weiss, Town Engineer			
2008 Continued Detection and Elimination The North Branford Public Works Department, RWA and East Shore Health District continue to work together to inspect, identify and correct illicit discharges, if required.				
Date: 1/1/2004	Responsible Party: Kurt Weiss, Town Engineer			
RWA & ESHD Partnership Continued existing partnership with the RWA and East Shore Health District to inspect, identify and correct illicit discharges.				

Detection and Elimination

Responsible Party: Kurt Weiss, Town Engineer				
Start Date: 10/2/2006		End Date: 10/5/2007		
Permits Years during which activities are scheduled:				
Year 1	Year 2	Year 3 X	Year 4 X	Year 5 X
Name of Separate Implementing Entity: Not Applicable				
BMP Description: Building on work performed in the previous two years a certain percentage of illicit discharges will now be detected and eliminated. Detection and elimination efforts will be documented so that an end of year report will detail all illicit discharges that were found, which ones were eliminated and what remedial actions were taken.				
Has Goal Been Accomplished: NO				

Work Performed

Date: 7/3/2006	Responsible Party: Fran Merola, Director of Public Works			
----------------	--	--	--	--

2006 Detection and Elimination In 2006, 34 outfalls were inspected. No illicit discharges were detected.	
Date: 3/13/2007	Responsible Party: Fran Merola, Director of Public Works
2007 Detection and Elimination In 2007, 21 outfalls were inspected. No illicit discharges were detected.	
Date: 1/1/2008	Responsible Party: Fran Merola, Director of Public Works
2008 Detection and Elimination In 2008, 34 outfalls were inspected. No illicit discharges were detected.	
Initial Identification of Illicit Discharge Sources	
Responsible Party: Kurt Weiss, Town Engineer	
Start Date: 10/4/2004	End Date: 6/5/2004
Permits Years during which activities are scheduled:	
Year 1 X	Year 2 X
Year 3	Year 4
Year 5	
Name of Separate Implementing Entity: Not Applicable	
BMP Description: Begin process of identifying potential sources from where illicit discharges can emanate. Areas to look for are:	
1. Industrial parks or areas with large concentrations of industrial business (manufacturing, warehousing, trucking, etc.).	
2. Areas where there are large concentrations of septic systems.	
3. Areas with older sanitary sewer lines.	
Has Goal Been Accomplished: NO	
Work Performed	
Date: 8/15/2005	Responsible Party: Kurt Weiss, Town Engineer
2005 Dry Weather Inspections In 2005, 34 dry weather inspections were conducted and recorded. No illicit discharges were detected.	
Date: 1/3/2005	Responsible Party: Kurt Weiss, Town Engineer
2005 ESHD The East Shore Health District is a regional health agency responsible for environmental health inspections in the greater New Haven area. Their responsibilities include the investigation of subsurface sewage disposal systems.	
In 2004/2005 fiscal year, the following work was performed:	
Site investigations: 338	
Sewage system repairs: 57	
Date: 1/3/2005	Responsible Party: Kurt Weiss, Town Engineer
2005 Outfall Testing (Wet Weather) In 2005, the Town was unable to conduct sampling and testing due to our inability to meet collection parameter of 72 hours between storm events. We understand that the Town is responsible for 2004 and 2005 testing.	
Connecticut Testing Laboratories, Inc., Meriden, CT remains under contract to perform the testing.	

Date: 1/3/2005	Responsible Party: Kurt Weiss, Town Engineer
<p>2005 RWA Inspections</p> <p>The RWA is responsible for the inspection of properties within their watershed. The Town of North Branford plays an integral part in their operation as approximately 60% of the water they supply to greater the New Haven area is supplied from Lake Gaillard.</p> <p>Due to the opening of the Whitney WTP in 2005, a greater emphasis was placed on inspections in the Hamden service area.</p> <p>The following site and plan reviews were conducted by the RWA in 2005:</p> <p>Watershed area inspections: 33</p> <p>Land Use Plan reviews: XX</p>	
Date: 7/3/2006	Responsible Party: Kurt Weiss, Town Engineer
<p>2006 Dry Weather Inspections</p> <p>In 2006, 10 dry weather inspections were conducted and recorded. No illicit discharges were detected.</p>	
Date: 1/2/2006	Responsible Party: Kurt Weiss, Town Engineer
<p>2006 ESHD</p> <p>The East Shore Health District is a regional health agency responsible for environmental health inspections in the greater New Haven area. Their responsibilities include the investigation of subsurface sewage disposal systems.</p> <p>In 2005/2006 fiscal year, the following work was performed:</p> <p>Site investigations: 338</p> <p>Sewage system repairs: 57</p>	
Date: 1/2/2006	Responsible Party: Kurt Weiss, Town Engineer
<p>2006 Outfall Testing (Wet Weather)</p> <p>In 2006, Town staff collected samples for permit years 2004, 2005 and 2006.</p> <p>Connecticut Testing Laboratories, Inc., Meriden, CT performed the testing. Hard copies of test results will be forwarded to the CT DEP.</p>	
Date: 1/2/2006	Responsible Party: Kurt Weiss, Town Engineer
<p>2006 RWA Inspections</p> <p>The RWA is responsible for the inspection of properties within their watershed. The Town of North Branford plays an integral part in their operation as approximately 60% of the water they supply to greater the New Haven area is supplied from Lake Gaillard.</p> <p>The following site and plan reviews were conducted by the RWA in 2006:</p> <p>Watershed area inspections: 1,157</p> <p>Land Use Plan reviews: 45</p>	
Date: 1/2/2007	Responsible Party: Kurt Weiss, Town Engineer
<p>2007 Dry Weather Inspections</p> <p>In 2007, 21 dry weather inspections were conducted and recorded. No illicit discharges were detected.</p>	
Date: 1/2/2007	Responsible Party: Kurt Weiss, Town Engineer
<p>2007 ESHD</p> <p>The East Shore Health District is a regional health agency responsible for environmental health</p>	

inspections in the greater New Haven area. Their responsibilities include the investigation of subsurface sewage disposal systems.

In 2007, the following work was performed:

Site investigations: 166

Sewage system repairs: 24

Date: 4/11/2007	Responsible Party: Kurt Weiss, Town Engineer
-----------------	--

2007 Outfall Testing (Wet Weather)

On 4/11/07, 2007 wet weather sampling was completed by Town staff.

Connecticut Testing Laboratories, Inc., Meriden, CT performed the testing. Hard copies of test results will be forwarded to the CT DEP.

Date: 1/2/2007	Responsible Party: Kurt Weiss, Town Engineer
----------------	--

2007 RWA Inspections

The RWA is responsible for the inspection of properties within their watershed. The Town of North Branford plays an integral part in their operation as approximately 60% of the water they supply to greater the New Haven area is supplied from Lake Gaillard. The following site and plan reviews and inspections conducted by the RWA in 2007:

Watershed area (sites): 629

Watershed area inspections: 586

Violations:2

Violations remaining:0

Plan reviews: 28

Date: 7/1/2008	Responsible Party: Kurt Weiss, Town Engineer
----------------	--

2008 Dry Weather Inspections

In 2008, 34 dry weather inspections were conducted and recorded. No illicit discharges were detected.

Date: 7/1/2008	Responsible Party: Kurt Weiss, Town Engineer
----------------	--

2008 ESHD

The East Shore Health District is a regional health agency responsible for environmental health inspections in the greater New Haven area. Their responsibilities include the investigation of subsurface sewage disposal systems.

In 2008, the following work was performed:

Site investigations: 147

Sewage system repairs: 22

Date: 1/1/2008	Responsible Party: Kurt Weiss, Town Engineer
----------------	--

2008 Outfall Testing

Wet weather sampling was not conducted in 2008. 2 weather samples will be taken in 2009.

Connecticut Testing Laboratories, Inc., Meriden, CT has been retained to perform the tests.

Date: 1/1/2008	Responsible Party: Kurt Weiss, Town Engineer
----------------	--

2008 RWA Inspections

The RWA is responsible for the inspection of properties within their watershed. The Town of North Branford plays an integral part in their operation as approximately 60% of the water they supply to greater the New Haven area is supplied from Lake Gaillard. The following site and plan reviews and inspections conducted by the RWA in 2008:

Watershed area (sites): 133

Watershed area inspections: 149

Violations:4

Violations remaining:0

Date: 9/1/2004	Responsible Party: Kurt Weiss, Town Engineer
----------------	--

Dry Weather Inspections
Conduct dry weather inspections and record results.

Date: 1/1/2004	Responsible Party: Kurt Weiss, Town Engineer
----------------	--

East Shore Health District
The East Shore Health District is a regional health agency responsible for environmental health inspections in the greater New Haven area. Their responsibilities include the investigation of subsurface sewage disposal systems. In 2003/2004 fiscal year, the following work was performed:

Site investigations: 38

Sewage system repairs: 8

Date: 10/4/2004	Responsible Party: Kurt Weiss, Town Engineer
-----------------	--

Identify High Risk Areas
Conducted field survey of high risk areas such as industrial parks, concentration of septic system problems and old sanitary sewers.

Worked with RWA and East Shore Health District to pin point at risk areas based on their respective inspections.

Utilized GIS to locate areas for future study.

Conducted a meeting with Town departments to draft a plan to detect and address non-stormwater discharges.

Convened a meeting to review appropriate methods for educating Town employees, businesses and the general public about illegal discharges and improper waste disposal.

Date: 10/1/2004	Responsible Party: Kurt Weiss, Town Engineer
-----------------	--

Outfall Testing (Wet Weather)
Prepared RFP for laboratory testing services. Hired Connecticut Testing Laboratories, Inc., Meriden, CT.

Using information gathered during initial identification of high risk areas, ESHD and RWA information, selected 6 outfalls for monitoring.

Unable to conduct sampling and testing due to inability to meet collection parameter of 72 hours between storm events.

Date: 1/1/2004	Responsible Party: Kurt Weiss, Town Engineer
----------------	--

RWA Inspections

The RWA is responsible for the inspection of properties within their watershed. The Town of North Branford plays an integral part in their operation as approximately 60% of the water they supply to greater the New Haven area is supplied from Lake Gaillard. The following site and plan reviews were conducted by the RWA in 2004:

Watershed area (sites): 241

Watershed area inspections: 317

Land Use Plan reviews: 41

Sewer System Map

Responsible Party: Kurt Weiss, Town Engineer

Start Date: 7/1/2004

End Date: 1/2/2009

Permits Years during which activities are scheduled:

Year 1 **X**

Year 2 **X**

Year 3 **X**

Year 4 **X**

Year 5 **X**

Name of Separate Implementing Entity:

Not Applicable

BMP Description:

The storm sewer system map is meant to demonstrate a basic awareness of the intake and discharge areas of the system. It is needed to help determine the extent of discharged dry weather flows, the possible sources of the dry weather flows, and the particular waterbodies these flows may be affecting. An existing map, such as a topographical map, on which the location of major pipes and outfalls can be clearly presented demonstrates such awareness.

EPA recommends collecting all existing information on outfall locations (e.g., review city records, drainage maps, storm drain maps), and then conducting field surveys to verify locations. It probably will be necessary to walk (i.e., wade through small receiving waters or use a boat for larger waters) the streambanks and shorelines for visual observation. More than one trip may be needed to locate all outfalls.

By the end of the second year of the permit, develop a map showing all stormwater discharges from pipes or conduits 15" or greater in diameter owned by the Town within the urbanized area.

By the end of the third year of the permit, develop a map showing all stormwater discharges from pipes or conduits 15" or greater in diameter owned by the Town anywhere within the Town

.By the end of the fourth year of the permit, develop a map showing all stormwater discharges from pipes or conduits 12" or greater in diameter owned by the Town within the urbanized area.

Has Goal Been Accomplished: YES

Work Performed

Date: 1/3/2005

Responsible Party: Al Perry, Civil Engineering Technician

2005 Outfall Mapping

In 2005, a GIS dataset was developed. Information collected included: type, size, material, water body discharged to, coordinates and watershed. To date, 208 out of potentially 300 outfalls have been mapped.

Date: 1/2/2006

Responsible Party: Al Perry, Civil Engineering Technician

2006 Outfall Mapping

In 2006, 105 stormwater outfalls were mapped. To date, 313 out of potentially 325 outfalls have been mapped.

Date: 1/2/2007	Responsible Party: Al Perry, Civil Engineering Technician				
2007 Outfall Mapping In 2007, the mapping of 366 stormwater outfalls located in the Town of North Branford was completed. The map includes the locations of all stormwater discharges from pipes or conduits 12" or greater in diameter owned by the Town within the urbanized area.					
Date: 1/1/2008	Responsible Party: Al Perry, Civil Engineering Technician				
2008 Outfall Mapping The mapping of 366 stormwater outfalls located in the Town of North Branford has been completed. The map includes the locations of all stormwater discharges from pipes or conduits 12" or greater in diameter owned by the Town within the urbanized area. Engineering staff updated the GIS storm sewer database to reflect new and reconstructed storm sewer projects completed in 2008.					
Date: 8/2/2004	Responsible Party: Al Perry, Civil Engineering Technician				
GIS Implemented a Town-wide GIS in partnership with the RWA. Planimetric, topographic and parcel mapping were developed. Developed procedures for the updating of GIS mapping relative to stormwater facilities. Used GIS mapping to initiate the location and identification of each stormwater outfall. All 15" and larger outfalls will be identified and mapped in 2005.					
Stormwater Ordinance					
Responsible Party: Kurt Weiss, Town Engineer					
Start Date: 6/4/2007			End Date: 6/5/2008		
Permits Years during which activities are scheduled:					
	Year 1	Year 2	Year 3	Year 4 X	Year 5
Name of Separate Implementing Entity: Not Applicable					
BMP Description: Develop an ordinance or other regulatory mechanism that will prohibit (to the extent allowable under State, or local law) all non-storm water discharges into the MS4. This ordinance will include appropriate enforcement procedures and actions such as: 1. Fines 2. Civil penalties					
Has Goal Been Accomplished: YES					
Work Performed					
Date: 11/6/2006	Responsible Party: Kurt Weiss, Town Engineer				
2006 Illicit Stormwater Discharge In 2006, the draft Illicit Stormwater Discharge Ordinance was presented to the Town Council and the Town Attorney for their review and comment.					
Date: 8/7/2007	Responsible Party: Kurt Weiss, Town Engineer				
2007 Illicit Stormwater Discharge					

On 8/7/2007, the Town adopted an Illicet Discharges and Illegal Connection Ordinance.				
Date: 1/1/2008	Responsible Party: Kurt Weiss, Town Engineer			
2008 Illicit Stormwater Ordinance On 8/7/2007, the Town adopted an Illicet Discharges and Illegal Connection Ordinance.				
Date: 11/18/2004	Responsible Party: Kurt Weiss, Town Engineer			
Illicit Stormwater Discharge Ordinance Using samples provided by the State of CT DEP, developed draft Illicit Stormwater Discharge Ordinance. The ordinance includes a prohibition on non-stormwater discharges into the MS4, appropriate enforcement procedures and actions.				
Date: 10/20/2004	Responsible Party: Kurt Weiss, Town Engineer			
Revised P & Z Regulations Drafted revisions to the Town's Planning and Zoning Regulations to include MS4 erosion control and non-stormwater discharge enforcement procedures and actions.				
Train Employees				
Responsible Party: Fran Merola, Director of Public Works				
Start Date: 7/1/2005	End Date: 7/1/2006			
Permits Years during which activities are scheduled:				
Year 1	Year 2 X	Year 3	Year 4	Year 5
Name of Separate Implementing Entity: Not Applicable				
BMP Description: Design and administer a training program to employees that will help them to identify illicit discharges.				
Has Goal Been Accomplished: YES				
Work Performed				
Date: 11/7/2005	Responsible Party: Fran Merola, Director of Public Works			
2005 Training 1n 2005, the Town purchased "Preventing Stormwater Pollution-What We Can Do" video. 14 Public Works staff members attended an in-house "Good Housekeeping" training session and viewed the video.				
Date: 10/18/2006	Responsible Party: Fran Merola, Director of Public Works			
2006 Training 1n 2006, 14 Public Works staff members attended an in-house "Good Housekeeping" training session. The Town's Highway crew attended an in-house training session on the approved methods for identifying, inspecting, documenting and cleaning outfalls.				
Date: 11/14/2007	Responsible Party: Fran Merola, Director of Public Works			
2007 Training 1n 2007, 14 Public Works staff members attended an in-house "Good Housekeeping" training session. The Town's Highway crew attended an in-house training session on the approved methods for identifying, inspecting, documenting and cleaning outfalls.				
Date: 1/1/2008	Responsible Party: Fran Merola, Director of Public Works			
2008 Training In 2008, 14 Public Works staff members attended an in-house "Good Housekeeping" training session. The Town's Highway crew attended an in-house training session on the approved methods for identifying, inspecting, documenting and cleaning outfalls.				

Date: 8/16/2004	Responsible Party: Al Perry, Civil Engineering Technician
<p data-bbox="203 231 495 262">Collect Training Material</p> <p data-bbox="203 262 1429 336">Collected available training materials form sources such as the EPA, DEP, RWA and other municipalities.</p> <p data-bbox="203 346 1429 420">Conducted initial meeting with Public Works and Engineering Department to evaluate training materials, potential partnering oppertunities and schedule tentitive training dates.</p>	

Pollution Prevention/Good Housekeeping

Descriptive Text:

Recognizing the benefits of pollution prevention practices, the rule requires the Town to:

1. Develop and implement an operation and maintenance program with the ultimate goal of preventing or reducing pollutant runoff from municipal operations into the storm sewer system;
2. Include employee training on how to incorporate pollution prevention/good housekeeping techniques into municipal operations such as park and open space maintenance, fleet and building maintenance, new construction and land disturbances, and storm water system maintenance. To minimize duplication of effort and conserve resources, the MS4 operator can use training materials that are available from EPA, their State or Tribe, or relevant organizations;
3. Determine the appropriate best management practices (BMPs) and measurable goals for this minimum control measure.

The Pollution Prevention/Good Housekeeping for municipal operations minimum control measure is a key element of the small MS4 storm water management program. This measure requires the small MS4 operator to examine and subsequently alter their own actions to help ensure a reduction in the amount and type of pollution that: (1) collects on streets, parking lots, open spaces, and storage and vehicle maintenance areas and is discharged into local waterways; and (2) results from actions such as environmentally damaging land development and flood management practices or poor maintenance of storm sewer systems. While this measure is meant primarily to improve or protect receiving water quality by altering municipal or facility operations, it also can result in a cost savings for the small MS4 operator, since proper and timely maintenance of storm sewer systems can help avoid repair costs from damage caused by age and neglect.

Number of BMPs associated with control measure:

8

Important Dates:

Earliest Start Date: 6/4/2004

End Date: 1/1/2009

Details of BMPs and Work Performed for Them

Develop Pollution Prevention Plan

Responsible Party: Kurt Weiss, Town Engineer				
Start Date: 6/4/2004		End Date: 7/2/2006		
Permits Years during which activities are scheduled:				
Year 1	Year 2	Year 3	Year 4	Year 5
X	X			
Name of Separate Implementing Entity: Not Applicable				
BMP Description: Develop a comprehensive Pollution Prevention Plan that identifies items such as:				
<ol style="list-style-type: none"> 1. BMPs 2. Management Practices and Maintenance Schedules 3. Recycling Efforts 4. Waste Disposal Guidelines 5. Areas of Concern 				
Has Goal Been Accomplished: YES				

Work Performed

Date: 1/3/2005	Responsible Party: Fran Merola, Director of Public Works
<p>2005 PPP</p> <p>In 2005, a draft "Best Practices for Municipal Operation" plan was developed. The plan identified Maintenance Activities, Schedules and procedures:ontrols for Eliminating Discharge of Pollutants;Procedures for the Proper Disposal of Waste and Municipal Employee Training.</p> <p>A Public Works Facility Inspection Check List was developed in conjunction with the BMP Plan.</p> <p>A field inspection form was also developed for use by Public Works staff. The form is used to record street sweeping, catch basin cleaning, storm sewer flushing and outfall inspection activities.</p>	
Date: 1/3/2005	Responsible Party: Fran Merola, Director of Public Works
<p>2005 PW Facility StormwaterPollution Prevention Plan</p> <p>In 2005, conducted annual Public Works facility site inspection and updated plan. Reviewed updated plan with Public Works employees during training session.</p>	
Date: 1/3/2005	Responsible Party: Fran Merola, Director of Public Works
<p>2005 Wash Water Recycling</p> <p>In 2005, monthly inspections of the Public Works truck and car wash recycling station were performed. Routine maintenance on the system was performed as needed.</p>	
Date: 1/2/2006	Responsible Party: Fran Merola, Director of Public Works
<p>2006 PPP</p> <p>In 2006, the draft "Best Practices for Municipal Operation" plan was modified based on comments by DPW staff during the implementation of the plan. The plan identified Maintenance Activities, Schedules and procedures:controls for Eliminating Discharge of Pollutants;Procedures for the Proper Disposal of Waste and Municipal Employee Training.</p> <p>In 2006, a field inspection form was used by DPW staff to record street sweeping, catch basin cleaning, storm sewer flushing and outfall inspection activities.</p>	
Date: 1/2/2006	Responsible Party: Fran Merola, Director of Public Works
<p>2006 PW Facility Stormwater Polution Prevention Plan</p>	

In 2006, Public Works facility site inspections were conducted and the Pollution Prevention Plan was updated.	
Date: 1/2/2006	Responsible Party: Fran Merola, Director of Public Works
2006 Wash Water Recycling In 2006, monthly inspections of the Public Works truck and car wash recycling station were performed. Routine maintenance on the system was performed as needed.	
Date: 1/2/2007	Responsible Party: Fran Merola, Director of Public Works
2007 PPP In 2007, DPW staff continued the use the "Best Practices for Municipal Operation" plan for Maintenance Activities, Schedules and procedures:controls for Eliminating Discharge of Pollutants;Procedures for the Proper Disposal of Waste and Municipal Employee Training. DPW staff continues to use the field inspection form to record street sweeping, catch basin cleaning, storm sewer flushing and outfall inspection activities.	
Date: 1/2/2007	Responsible Party: Fran Merola, Director of Public Works
2007 PW Facility Stormwater Pollution Prevention Plan In 2007, DPW staff conducted the annual Public Works facility site inspection.	
Date: 1/2/2007	Responsible Party: Fran Merola, Director of Public Works
2007 Wash Water Recycling In 2007, daily inspections of the Public Works truck and car wash recycling station were performed. Routine maintenance on the system was performed as needed.	
Date: 1/1/2008	Responsible Party: Fran Merola, Director of Public Works
2008 PPP In 2008, DPW staff continued the use the "Best Practices for Municipal Operation" plan for Maintenance Activities, Schedules and procedures:controls for Eliminating Discharge of Pollutants;Procedures for the Proper Disposal of Waste and Municipal Employee Training. DPW staff continues to use the field inspection form to record street sweeping, catch basin cleaning, storm sewer flushing and outfall inspection activities.	
Date: 1/1/2008	Responsible Party: Fran Merola, Director of Public Works
2008 PW Facility Stormwater Pollution Prevention Plan In 2008, DPW staff conducted the annual Public Works facility site inspection. 2008 wet weather sampling at the DPW facility was completed. Testing was completed by Connecticut Testing Laboratories, Inc., Meriden, CT.	
Date: 1/1/2008	Responsible Party: Fran Merola, Director of Public Works
2008 Wash Water Recycling In 2008, daily inspections of the Public Works truck and car wash recycling station were performed. Routine maintenance on the system was performed as needed.	
Date: 12/5/2004	Responsible Party: Kurt Weiss, Town Engineer
PPP Meeting Met with Public Works Director to formulate pollution prevention/good housekeeping techniques and initiate plan draft. Reviewed training materials. Reviewed the effectiveness of the current street cleaning program and identified areas of improvement. Reviewed the effectiveness of the current catch basin cleaning program and identified areas of improvement.	

Date: 3/30/2004		Responsible Party: Fran Merola, Director of Public Works			
PW Facility Stormwater Pollution Prevention Plan Performed annual Public Works facility site inspection and updated plan. Reviewed updated plan with Public Works employees.					
Date: 1/1/2004		Responsible Party: Fran Merola, Director of Public Works			
Wash Water Recycling Conducted monthly inspections of the Public Works truck and car wash recycling station.					
Employee Training Materials					
Responsible Party: Kurt Weiss, Town Engineer					
Start Date: 7/1/2004		End Date: 7/1/2005			
Permits Years during which activities are scheduled:					
	Year 1 X	Year 2 X	Year 3	Year 4	Year 5
Name of Separate Implementing Entity: Not Applicable					
BMP Description: Develop a collection of training materials that will be used to educate staff about pollution prevention and good housekeeping. These resources will come from applicable external sources, such as the EPA, and may be supplemented with materials developed by our own organization.					
Has Goal Been Accomplished: YES					
Work Performed					
Date: 11/14/2005		Responsible Party: Fran Merola, Director of Public Works			
2005 Employee Training Materials In 2005, obtained a copy of the "Preventing Stormwater Pollution-What we can do" video which was used to train Public Works staff. Reviewed field inspection report with DPW staff to insure consistence in record keeping. Also used materials obtained in 2004 as part of the training session.					
Date: 1/2/2006		Responsible Party: Fran Merola, Director of Public Works			
2006 Employee Training Materials In 2006, the Director reviewed field inspection report forms with DPW staff to insure consistency in record keeping. Then DPW continued use of training materials obtained in 2004.					
Date: 1/2/2007		Responsible Party: Fran Merola, Director of Public Works			
2007 Employee Training Materials In 2007, the Director reviewed field inspection report forms with DPW staff to insure consistency in record keeping. The DPW continued the use of training materials obtained in 2004 for in-house training sessions.					
Date: 4/1/2008		Responsible Party: Fran Merola, Director of Public Works			
2008 Employee Training Materials In 2008, the Director reviewed field inspection report forms with DPW staff to insure consistency in record keeping. The DPW continued the use of training materials obtained in 2004 for in-house training sessions.					

Date: 9/5/2004	Responsible Party: Fran Merola, Director of Public Works				
Training Materials Organized collection of training materials from EPA, DEP and web sites.					
Incorporation of BMPs in Master Plan					
Responsible Party: Kurt Weiss, Town Engineer					
Start Date: 7/1/2005			End Date: 7/2/2007		
Permits Years during which activities are scheduled:					
Year 1	Year 2 X	Year 3	Year 4	Year 5	
Name of Separate Implementing Entity: Not Applicable					
BMP Description: Identify, from the list of BMPs outlined in the year one goal 'Develop Pollution Prevention Plan', the BMPs that have been incorporated into the local Master Plan.					
Has Goal Been Accomplished: YES					
Work Performed					
Date: 1/3/2005	Responsible Party: Kurt Weiss, Town Engineer				
2005 BMP's in Master Plan In 2005, we identified, from the list of BMPs outlined in the year one goal 'Develop Pollution Prevention Plan', the BMPs have been incorporated into the North Branford Master Plan.					
Date: 12/5/2004	Responsible Party: Kurt Weiss, Town Engineer				
Draft Plan Initiate collection of BMP's from permit year 1 to incorporate in the Town's Master Plan.					
Information Management System					
Responsible Party: Fran Merola, Director of Public Works					
Start Date: 7/1/2004			End Date: 7/3/2006		
Permits Years during which activities are scheduled:					
Year 1 X	Year 2 X	Year 3	Year 4	Year 5	
Name of Separate Implementing Entity: Not Applicable					
BMP Description: An information management system will be put in place that can be used to track the inventory of stormwater facilities and outfalls. This system will be used by staff to schedule and perform inspections, maintenance activities and document any other actions taken on these inventory items.					
Has Goal Been Accomplished: YES					
Work Performed					
Date: 4/5/2004	Responsible Party: Kurt Weiss, Town Engineer				
Asist Software Purchased Assist software for the preparation of the Town's MS4 plan and MS4 and CS Pro for the the inventory and tracking of stormwater facilities, outfalls and inspections.					
Maintenance Program Effectiveness					
Responsible Party: Kurt Weiss, Town Engineer					
Start Date: 7/2/2007			End Date: 1/1/2009		

Permits Years during which activities are scheduled:				
Year 1	Year 2	Year 3	Year 4 X	Year 5 X
Name of Separate Implementing Entity: Not Applicable				
BMP Description: Identify the number of facilities and controls that have received maintenance as a result of the year three goal 'Maintenance Schedule'. Document the overall compliance with the schedule and explain any discrepancies.				
Has Goal Been Accomplished: YES				
Work Performed				
Date: 1/3/2005	Responsible Party: Fran Merola, Director of Public Works			
2005 Catch Basin Cleaning During 2005, 203 catch basins were cleaned. Out of approximately 3,000 catch basins, 436 have been cleaned since the issuance of the Town's permit.				
Date: 1/3/2005	Responsible Party: Fran Merola, Director of Public Works			
2005 Material Management In 2005, monthly inspections of material storage areas were conducted.				
Date: 1/3/2005	Responsible Party: Fran Merola, Director of Public Works			
2005 Outfall Inspections and Cleaning In 2005, the Public Works Department inspected 34 stormwater outfalls for dry weather flows. No illicit discharges were detected. Work also included, clearing brush and debris, channel clearing and slope stabilization.				
<p>By letter dated January 11, 2006, the Town was notified that Cedar and Linsley Pond's TMDL's were approved by the EPA on December 29, 2005. Per Section 6 (k) of the MS4 Permit, municipalities that discharge to TMDL water bodies must modify their Stormwater Management Plan to address the TMDL within 4 months of notification. On January 20, 2006 we contacted Kelley Streich to clarify the letter. She said we should address what the Town plans to do to minimize the discharges in our SWMP.</p> <p>We informed Kelly that we have selected an outfall (Commerce Drive) that discharges into the ponds as one of our 6 sample points. We will reference the TMDL's in our testing documentation.</p> <p>Kelly also informed us that Tilcon, a quarry located upstream of Cedar and Linsley Ponds had been identified as the primary contributor to the algae and vegetation growth. They were also notified by the CTDEP and asked to revise their SWMP.</p>				
Date: 1/3/2005	Responsible Party: Anthony Esposito, Finance Director			
2005 Spill Team In 2005, the Town's Fire Services Spill team responded to 8 spill events which required action. Each spill was contained and contaminated materials disposed off in accordance with the Town's "Emergency Response Plan for Hazardous Materials Accidents"				
Date: 6/13/2005	Responsible Party: Fran Merola, Director of Public Works			
2005 Storm Sewer Construction In 2005, approximately 1215 linear feet of storm sewer pipe was installed to improve storm water quality. Tasks included installation of catch basins with sumps to collect road sand.				
Date: 7/11/2005	Responsible Party: Fran Merola, Director of Public Works			
2005 Storm Sewer Flushing In 2005, 1312 linear feet of storm sewer piping was flushed to clean interior pipe surfaces and improve system performance.				

Date: 4/11/2005	Responsible Party: Fran Merola, Director of Public Works
2005 Street Sweeping In 2005, approximately 76 miles (entire town) of local roads were swepted. All Town owned parking lots were also swept.	
Date: 8/22/2005	Responsible Party: Fran Merola, Director of Public Works
2005 Waste Disposal Procedures In 2005, used the draft "Best Practices for Municipal Operation" plan and CTDEP "Guideline of Street Sweeping and Catch Basin Cleanings as a basis for reviewing waste disposal procedures with DPW staff.	
Date: 4/3/2006	Responsible Party: Fran Merola, Director of Public Works
2006 Catch Basin Cleaning During 2006, 1751 catch basins were cleaned out of a total of approximately 2,000 catch basins. DPW staff continues to repeatedly clean catch basins in the vicinity of Cedar and Linsley Pond's due to the elevated levels of TMDL's discharged into the ponds as identified by the EPA by letter dated December 29, 2005.	
Date: 1/2/2006	Responsible Party: Fran Merola, Director of Public Works
2006 Material Management In 2006, monthly inspections of material storage areas were conducted.	
Date: 4/3/2006	Responsible Party: Fran Merola, Director of Public Works
2006 Outfall Inspection and Cleaning In 2006, the Public Works Department inspected 10 stormwater outfalls for dry weather flows. No illicit discharges were detected. Work also included, clearing brush and debris, channel clearing and slope stabilization at 34 outfalls. In 2006, 3150 feet of swales and ditched were cleaned. Catch basins in the vicinity of Cedar and Linsley Ponds (see below) were monitored and cleaned throughout the year. By letter dated January 11, 2006, the Town was notified that Cedar and Linsley Pond's TMDL's were approved by the EPA on December 29, 2005. Per Section 6 (k) of the MS4 Permit, municipalities that discharge to TMDL water bodies must modify their Stormwater Management Plan to address the TMDL within 4 months of notification. On January 20, 2006 we contacted Kelley Streich to clarify the letter. She said we should address what the Town plans to do to minimize the discharges in our SWMP. We informed Kelly that we have selected an outfall (Commerce Drive) that discharges into the ponds as one of our 6 sample points. We will reference the TMDL's in our testing documentation. In addition, DPW staff continually inspected and cleaned catch basins in the vicinity of Cedar and Linsley Pond's throughout the year. Kelly also informed us that Tilcon, a quarry located upstream of Cedar and Linsley Ponds had been identified as the primary contributor to the algae and vegetation growth. They were also notified by the CTDEP and asked to revise their SWMP.	
Date: 1/2/2006	Responsible Party: Anthony Esposito, Finance Director
2006 Spill Team In 2006, the Town's Fire Services Spill team responded to 3 spill events which required action. Each spill was contained and contaminated materials disposed off in accordance with the Town's "Emergency Response Plan for Hazardous Materials Accidents"	
Date: 5/8/2006	Responsible Party: Fran Merola, Director of Public Works
2006 Storm Sewer Construction	

In 2006, approximately 120 linear feet of storm sewer pipe was installed to improve storm water quality.	
Date: 7/10/2006	Responsible Party: Fran Merola, Director of Public Works
2006 Storm Sewer Flushing In 2006, 2550 linear feet of storm sewer piping was flushed to clean interior pipe surfaces and improve system performance.	
Date: 4/3/2006	Responsible Party: Fran Merola, Director of Public Works
2006 Street Sweeping In 2006, approximately 76 miles (entire town) of local roads were swept at least one time. All Town owned parking lots were also swept at least one time.	
Date: 1/2/2006	Responsible Party: Fran Merola, Director of Public Works
2006 Waste Disposal Procedures In 2006, used the draft "Best Practices for Municipal Operation" plan and CTDEP "Guideline of Street Sweeping and Catch Basin Cleanings as a basis for reviewing waste disposal procedures with DPW staff.	
Date: 4/12/2007	Responsible Party: Fran Merola, Director of Public Works
2007 Catch Basin Cleaning During 2007, 1001 catch basins were cleaned out of a total of approximately 2,200 catch basins. DPW staff continues to repeatedly clean catch basins in the vicinity of Cedar and Linsley Pond's due to the elevated levels of TMDL's discharged into the ponds as identified by the EPA by letter dated December 29, 2005.	
Date: 1/2/2007	Responsible Party: Fran Merola, Director of Public Works
2007 Material Management In 2007, the DPW continued monthly inspections of material storage areas.	
Date: 4/2/2007	Responsible Party: Fran Merola, Director of Public Works
2007 Outfall Inspection and Cleaning In 2007, the Public Works Department inspected 21 stormwater outfalls for dry weather flows. No illicit discharges were detected. Work also included, clearing brush and debris, channel clearing and slope stabilization at 54 outfalls. 2 stormwater outfalls were reconstructed. Catch basins in the vicinity of Cedar and Linsley Ponds (see below) were monitored and cleaned throughout the year. By letter dated January 11, 2006, the Town was notified that Cedar and Linsley Pond's TMDL's were approved by the EPA on December 29, 2005. Per Section 6 (k) of the MS4 Permit, municipalities that discharge to TMDL water bodies must modify their Stormwater Management Plan to address the TMDL within 4 months of notification. On January 20, 2006 we contacted Kelley Streich to clarify the letter. She said we should address what the Town plans to do to minimize the discharges in our SWMP. We informed Kelly that we have selected an outfall (Commerce Drive) that discharges into the ponds as one of our 6 sample points. We will reference the TMDL's in our testing documentation. DPW staff continued to inspect and clean catch basins in the vicinity of Cedar and Linsley Pond's throughout the year. Kelly also informed us that Tilcon, a quarry located upstream of Cedar and Linsley Ponds had been identified as the primary contributor to the algae and vegetation growth. They were also notified by the CTDEP and asked to revise their SWMP.	
Date: 1/2/2007	Responsible Party: Anthony Esposito, Finance Director

2007 Spill Team

In 2007, the Town's Fire Services Spill team responded to 8 spill events which required action. Each spill was contained and contaminated materials disposed off in accordance with the Town's "Emergency Response Plan for Hazardous Materials Accidents".

3 Hazmat Operation classes were attended by 71 fire personnel

32 fire and medical personnel attended company level Hazmat Awareness training.

11 fire personnel attended EPA Hazmat tech level training.

Date: 3/5/2007	Responsible Party: Fran Merola, Director of Public Works
----------------	--

2007 Storm Sewer Construction

In 2007, approximately 805 linear feet of storm sewer pipe was installed to improve storm water quality.

Date: 5/15/2007	Responsible Party: Fran Merola, Director of Public Works
-----------------	--

2007 Storm Sewer Flushing

In 2007, 2075 linear feet of storm sewer piping was flushed to clean interior pipe surfaces and improve system performance.

Date: 4/23/2007	Responsible Party: Fran Merola, Director of Public Works
-----------------	--

2007 Street Sweeping

In 2007, approximately 76 miles (entire town) of local roads were swept at least one time. All Town owned parking lots were also swept at least one time.

Date: 1/2/2007	Responsible Party: Fran Merola, Director of Public Works
----------------	--

2007 Waste Disposal Procedures

In 2007, the DPW Director continued to use the "Best Practices for Municipal Operation" plan and CTDEP "Guideline for Street Sweeping and Catch Basin Cleanings as a basis for reviewing waste disposal procedures with DPW staff.

Date: 1/1/2008	Responsible Party: Fran Merola, Director of Public Works
----------------	--

2008 Catch Basin Cleaning

During 2008, 532 catch basins were cleaned out of a total of approximately 2,200 catch basins.

DPW staff continues to repeatedly clean catch basins in the vicinity of Cedar and Linsley Pond's due to the elevated levels of TMDL's discharged into the ponds as identified by the EPA by letter dated December 29, 2005.

Date: 4/1/2008	Responsible Party: Fran Merola, Director of Public Works
----------------	--

2008 Material Management

In 2008, the DPW continued to conduct monthly inspections of material storage areas.

Date: 1/1/2008	Responsible Party: Fran Merola, Director of Public Works
----------------	--

2008 Outfall Inspection and Cleaning

In 2008, the Public Works Department inspected 34 stormwater outfalls for dry weather flows. No illicit discharges were detected. Work also included, clearing brush and debris, channel clearing and slope stabilization at 18 outfalls.

Catch basins in the vicinity of Cedar and Linsley Ponds (see below) were monitored and cleaned throughout the year.

By letter dated January 11, 2006, the Town was notified that Cedar and Linsley Pond's TMDL's were approved by the EPA on December 29, 2005. Per Section 6 (k) of the MS4 Permit, municipalities that discharge to TMDL water bodies must modify their Stormwater Management Plan to address the TMDL within 4 months of notification. On January 20, 2006 we contacted Kelley Streich to clarify the letter. She said we should address what the Town plans to do to minimize the discharges in our SWMP.

We informed Kelly that we have selected an outfall (Commerce Drive) that discharges into the ponds as one of our 6 sample points. We will reference the TMDL's in our testing documentation.

DPW staff continued to inspect and clean catch basins in the vicinity of Cedar and Linsley Pond's throughout the year.

Kelly also informed us that Tilcon, a quarry located upstream of Cedar and Linsley Ponds had been identified as the primary contributor to the algae and vegetation growth. They were also notified by the CTDEP and asked to revise their SWMP.

Date: 1/1/2008	Responsible Party: Anthony Esposito, Finance Director
<p>2008 Spill Team In 2008, the Town's Fire Services Spill team responded to 6 spill events which required action. Each spill was contained and contaminated materials disposed off in accordance with the Town's "Emergency Response Plan for Hazardous Materials Accidents".</p> <p>3 Hazmat Operation classes were attended by 71 fire personnel</p> <p>32 fire and medical personnel attended company level Hazmat Awareness training.</p> <p>11 fire personnel attended EPA Hazmat tech level training.</p>	
Date: 1/1/2008	Responsible Party: Fran Merola, Director of Public Works
<p>2008 Storm Sewer Construction In 2008, approximately 830 linear feet of storm sewer pipe and 11 catch basins with sumps were installed to improve storm water quality.</p>	
Date: 1/1/2008	Responsible Party: Fran Merola, Director of Public Works
<p>2008 Storm Sewer System Flushing In 2008, 2035 linear feet of storm sewer piping was flushed to clean interior pipe surfaces and improve system performance.</p>	
Date: 1/1/2008	Responsible Party: Fran Merola, Director of Public Works
<p>2008 Street Sweeping In 2008, approximately 76 miles (entire town) of local roads were swept at least one time. All Town owned parking lots were also swept at least one time.</p>

Date: 1/1/2004	Responsible Party: Fran Merola, Director of Public Works
<p>Catch Basin Cleaning During 2004, 233 out of approximately 3,000 catch basins were cleaned.</p>	
Date: 7/1/2004	Responsible Party: Fran Merola, Director of Public Works
<p>Material Management Reviewed current materials management procedures for new materials facility.</p> <p>Conducted monthly inspections of material storage areas.</p>	
Date: 3/8/2004	Responsible Party: Fran Merola, Director of Public Works
<p>Outfall Cleaning In 2004, the Public Works Department cleaned 45 stormwater outfalls. Work included clearing brush and debris, channel clearing and slope stabilization.</p>	

Date: 1/5/2004	Responsible Party: Karl Kilduff, Town Manager				
Spill Team The Town's Fire Services Spill team responded to 10 spill events which required action.					
Date: 4/1/2004	Responsible Party: Fran Merola, Director of Public Works				
Storm Sewer Construction In 2004, approximately 1,200 linear feet of storm sewer pipe was installed to improve storm water quality. Tasks included installation of catch basins with sumps to collect road sand and an 85 linear feet of riprapped discharge swale to collect and filter discharge pollutants.					
Date: 6/1/2004	Responsible Party: Fran Merola, Director of Public Works				
Storm Sewer System Flushing In 2004, 750 linear feet of storm sewer piping was flushed to clean interior pipe surfaces and improve system performance.					
Date: 1/1/2004	Responsible Party: Fran Merola, Director of Public Works				
Street Sweeping During 2004, approximately 76 miles (entire town) of local roads were swept.					
Date: 7/1/2004	Responsible Party: Fran Merola, Director of Public Works				
Waste Disposal Procedures Reviewed current road and catch basin waste disposal procedures with DPW staff.					
Maintenance Schedule					
Responsible Party: Fran Merola, Director of Public Works					
Start Date: 7/1/2005		End Date: 7/2/2007			
Permits Years during which activities are scheduled:					
	Year 1	Year 2 X	Year 3 X	Year 4	Year 5
Name of Separate Implementing Entity: Not Applicable					
BMP Description: Finalize the maintenance plan and schedule that will be put in place for management of BMPs. Integrate this into the information management system identified in the year one goal 'Information Management System'.					
Has Goal Been Accomplished: YES					
Work Performed					
Date: 1/3/2005	Responsible Party: Fran Merola, Director of Public Works				
2005 Maintenance Plan In 2005, the "Best Practices for Municipal Operations" plan was used to develop schedules for maintenance activities.					
Date: 1/2/2006	Responsible Party: Fran Merola, Director of Public Works				
2006 Maintenance Plan In 2006, continued using schedules listed in the "Best Practices for Municipal Operations" plan for maintenance activities.					
Date: 1/2/2007	Responsible Party: Fran Merola, Director of Public Works				
2007 Maintenance Plan In 2007, continued using schedules listed in the "Best Practices for Municipal Operations" plan for maintenance activities.					
Date: 1/1/2008	Responsible Party: Fran Merola, Director of Public Works				
2008 Maintenance Plan In 2008, continued using schedules listed in the "Best Practices for Municipal Operations" plan for					

maintenance activities.

Date: 12/5/2004 Responsible Party: Fran Merola, Director of Public Works

Draft Maintenance Plan
Commenced review of existing Public Works maintenance plan and schedule and incorporation of BMP's identified in the pollution prevention plan.

Municipal Management Plan

Responsible Party: Fran Merola, Director of Public Works

Start Date: 1/2/2006 End Date: 10/13/2006

Permits Years during which activities are scheduled:

Year 1	Year 2	Year 3	Year 4 X	Year 5
--------	--------	--------	----------	--------

Name of Separate Implementing Entity:
Not Applicable

BMP Description:
Develop a municipal management plan (MMP). identify BMP's to eliminate runoff from Town sites.

Utilize the MMP as a training tool.

Has Goal Been Accomplished: YES

Work Performed

Date: 3/1/2006 Responsible Party: Fran Merola, Director of Public Works

2006 Municipal Management Plan
Completed a Draft Municipal Management Plan. Identified BMP's for:
Maintenance Activities, Schedules And Long-Term Inspection Procedures
Controls For Reducing Or Eliminating Discharge Of Pollutants
Procedures For The Proper Disposal Of Waste
Water Quality Techniques In Flood Damage Reduction Activities
Municipal Employee Training

Established the Integrated Pest Management Committee to evaluate how the Town can minimize the use of herbicides and pesticides.

Date: 11/9/2007 Responsible Party: Fran Merola, Director of Public Works

2007 Municipal Management Plan
In 2007, the Municipal Management Plan was completed.

The Integrated Pest Management Committee (BOE and DPW) met to discuss methods to minimize the use of herbicides and pesticides on Town property.

Date: 1/1/2008 Responsible Party: Fran Merola, Director of Public Works

2008 Municipal Management Plan
In 2008, the Municipal Management Plan was completed.

The Integrated Pest Management Committee (BOE and DPW) met to discuss methods to minimize the use of herbicides and pesticides on Town property.

Train Employees

Responsible Party: Fran Merola, Director of Public Works

Start Date: 7/1/2005 End Date: 7/2/2007

Permits Years during which activities are scheduled:

Year 1	Year 2 X	Year 3 X	Year 4	Year 5
--------	----------	----------	--------	--------

Name of Separate Implementing Entity:
Not Applicable

BMP Description:

Train staff on pollution prevention and good housekeeping using the materials collected and developed in the year one goal 'Employee Training Materials'.

Has Goal Been Accomplished: YES

Work Performed

Date: 12/9/2005 Responsible Party: Fran Merola, Director of Public Works

2005 Training

In 2005, the "Preventing Stormwater Pollution-What we can do" video was used to train Public Works staff.

Reviewed the daft "Best Practices for Municipal Operation" with DPW staff.

Reviewed the Public Works Facility Inspection Check List with DPW staff.

Reviewed the field inspection form with DPW staff. Activities such as street sweeping, catch basin cleaning, storm sewer flushing and outfall inspection were discussed.

Used materials obtained in 2004 as part of the training session.

Date: 10/2/2006 Responsible Party: Fran Merola, Director of Public Works

2006 Training

In 2006, the "Preventing Stormwater Pollution-What we can do" video was used to train Public Works staff.

Reviewed the daft "Best Practices for Municipal Operation" with DPW staff.

Reviewed the Public Works Facility Inspection Check List with DPW staff.

Reviewed the field inspection form with DPW staff. Activities such as street sweeping, catch basin cleaning, storm sewer flushing and outfall inspection were discussed.

Date: 10/1/2007 Responsible Party: Fran Merola, Director of Public Works

2007 Training

In 2007, the following training session were attended by DPW staff:

One employee attended 5 pesticide application seminars.

Fifteen employees attended a treated salt application training session.

Date: 1/1/2008 Responsible Party: Fran Merola, Director of Public Works

2008 Training

In 2008, the following training session were attended by DPW staff:

One employee attended 5 pesticide application seminars.

Fifteen employees attended a treated salt application training session.

DPW staff received training on the utilization of Cirus electronic salt spreader controls. The controls allow the recording and downloading of storm event and performance data.

Date: 2/16/2004	Responsible Party: Fran Merola, Director of Public Works
<p>Training Sessions Conducted 2 DPW staff training sessions. Subjects discussed included:</p> <ul style="list-style-type: none">Vehicle maintenance and pollution preventionHazardous materials storageIllegal Dumping controlStreet SweepingStorm Drain cleaning	

Construction Site Runoff Control

Descriptive Text:

The Phase II Final Rule requires an operator of a regulated small MS4 to develop, implement, and enforce a program to reduce pollutants in storm water runoff to their MS4 from construction activities that result in a land disturbance of greater than or equal to one acre.

The small MS4 operator is required to:

1. Have an ordinance or other regulatory mechanism requiring the implementation of proper erosion and sediment controls, and controls for other wastes, on applicable construction sites;
2. Have procedures for site plan review of construction plans that consider potential water quality impacts;
3. Have procedures for site inspection and enforcement of control measures;
4. Have sanctions to ensure compliance (established in the ordinance or other regulatory mechanism);
5. Establish procedures for the receipt and consideration of information submitted by the public; and
6. Determine the appropriate best management practices (BMPs) and measurable goals for this minimum control measure.

Polluted storm water runoff from construction sites often flows to MS4s and ultimately is discharged into local rivers and streams. Of the pollutants listed in Table 1, sediment is usually the main pollutant of concern. Sediment runoff rates from construction sites are typically 10 to 20 times greater than those of agricultural lands, and 1,000 to 2,000 times greater than those of forest lands. During a short period of time, construction sites can contribute more sediment to streams than can be deposited naturally during several decades. The resulting siltation, and the contribution of other pollutants from construction sites, can cause physical, chemical, and biological harm to our nation's waters. For example, excess sediment can quickly fill rivers and lakes, requiring dredging and destroying aquatic habitats.

Table 1
Pollutants Commonly Discharged From Construction Sites

Sediment
Solid and sanitary wastes
Phosphorous (fertilizer)
Nitrogen (fertilizer)
Pesticides
Oil and grease
Concrete truck washout

Number of BMPs associated with control measure:

Year 1 Year 2 **X** Year 3 **X** Year 4 Year 5

Name of Separate Implementing Entity:

Not Applicable

BMP Description:

Random inspections of construction sites will be performed to determine the overall compliance rate that is being achieved by construction operators.

Has Goal Been Accomplished: YES

Work Performed

Date: 1/3/2005

Responsible Party: Al Perry, Civil Engineering Technician

2005 Construction Inspections

In 2005, 182 Inspections of construction sites were performed by Town staff.

5 letters for corrective action were sent to developers as a result of the site inspections.

Date: 1/2/2006

Responsible Party: Kurt Weiss, Town Engineer

2006 Construction Inspections

In 2006, 124 random inspections of construction sites were performed by Town staff.

3 letters for corrective action were sent to developers as a result of site inspections.

Date: 1/2/2007

Responsible Party: Kurt Weiss, Town Engineer

2007 Construction Inspections

In 2007, 118 random inspections of construction sites were performed by Town staff.

Date: 1/1/2008

Responsible Party: Al Perry, Civil Engineering Technician

2008 Construction Inspections

In 2008, 175 random inspections of construction sites were performed by Town staff.

Date: 3/30/2004

Responsible Party:

Begin Inspections

177 Inspections of construction sites were performed by Town staff.

7 letters for corrective action were sent to developers as a result of the site inspections.

Information Management System in Place

Responsible Party: Kurt Weiss, Town Engineer

Start Date: 7/1/2005

End Date: 7/2/2007

Permits Years during which activities are scheduled:

Year 1 Year 2 **X** Year 3 **X** Year 4 Year 5

Name of Separate Implementing Entity:

Not Applicable

BMP Description:

An information management system designed to track information submitted by the public and record staff inspections of construction sites will be put in place.

Develop site inspection procedures that will be used by staff in the performance of construction site inspections.

Has Goal Been Accomplished: YES

Work Performed

Date: 1/3/2005 Responsible Party: Kurt Weiss, Town Engineer

2005 Asist Software
In 2005, we continued to utilize Asist software program to track construction site monitoring and follow up actions of construction site activities performed at residential, commercial, and industrial construction sites.

Date: 1/2/2006 Responsible Party: Kurt Weiss, Town Engineer

2006 Asist Software
In 2006, we continued to utilize Asist software program to track construction site monitoring and follow up actions of construction site activities performed at residential, commercial, and industrial construction sites.

Date: 1/2/2007 Responsible Party: Kurt Weiss, Town Engineer

2007 Asist Software
In 2007, we continued to utilize Asist software program to track construction site monitoring and follow up actions of construction site activities performed at residential, commercial, and industrial construction sites.

Date: 1/1/2008 Responsible Party: Kurt Weiss, Town Engineer

2008 Asist Software
In 2008, we continued to utilize Asist software program to track construction site monitoring and follow up actions of construction site activities performed at residential, commercial, and industrial construction sites.

Date: 9/5/2004 Responsible Party:

Asist Software
Utilized Asist Construction Pro software program to track construction site monitoring and follow up actions of construction site activities performed at residential, commercial, and industrial construction sites. The engineering Department began to record staff inspections of construction sites utilizing the software

Maximum Compliance

Name of Separate Implementing Entity: Not Applicable					
BMP Description: Under the extent allowable by law an ordinance or other regulatory mechanism will be put in place that will provide the ability to regulate polluted runoff that emanates from construction sites.					
Has Goal Been Accomplished: NO					
Work Performed					
Date: 1/3/2005		Responsible Party: Carol Zebb, Town Planner			
2005 Draft P & Z Regulations In 2005 the draft of revised P & Z Regulations were submitted to Town department heads for their review and comment.					
Date: 1/3/2005		Responsible Party: Carol Zebb, Town Planner			
2005 Site Plan Review In 2005, conducted 7 site plan reviews to insure that proper design plans were developed for erosion and sedimentation control and that the plans comply with the CTDEP's Guidelines for Soil Erosion and Sediment Control, 2002. in 2005, site 16 plan reviews were also conducted in conjunction with the Town's Inland/Wetlands application process. 4 Notices of Violations with follow-up action were issued.					
Date: 7/3/2006		Responsible Party: Kurt Weiss, Town Engineer			
2006 Draft P & Z Regulations In 2006 the draft of revised P & Z Regulations were reviewed by Town department heads.					
Date: 1/2/2006		Responsible Party: Karl Kilduff, Town Manager			
2006 Site Plan Review In 2006, conducted 40 site plan reviews to insure that proper design plans were developed for erosion and sedimentation control and that the plans comply with the CTDEP's Guidelines for Soil Erosion and Sediment Control, 2002. In 2006, site 26 plan reviews were also conducted in conjunction with the Town's Inland/Wetlands application process. 3 Notices of Violations with follow-up action were issued.					
Date: 1/2/2007		Responsible Party: Kurt Weiss, Town Engineer			
2007 Draft P & Z Regulations In 2007, review of the draft P & Z Regulations continues. The revised regs require proper erosion and sediment controls, and controls for other wastes, on all applicable construction sites. Additionally, recommendations from the new Plan of Conservation and Development will be considered for inclusion in the P & Z Regulations.					
Date: 1/2/2007		Responsible Party: Karl Kilduff, Town Manager			
2007 Site Plan Review					

In 2007, conducted 35 site plan reviews to insure that proper design plans were developed for erosion and sedimentation control and that the plans comply with the CTDEP's Guidelines for Soil Erosion and Sediment Control, 2002.

In 2007, site 14 plan reviews were also conducted in conjunction with the Town's Inland/Wetlands application process.

2 Notices of Violations with follow-up action were issued.

Date: 1/1/2008	Responsible Party: Kurt Weiss, Town Engineer
----------------	--

2008 Draft P & Z Regulations

In 2008, review of the draft P & Z Regulations continues. The revised regs require proper erosion and sediment controls, and controls for other wastes, on all applicable construction sites. Additionally, recommendations from the new Plan of Conservation and Development will be considered for inclusion in the P & Z Regulations.

Date: 1/1/2008	Responsible Party: Kurt Weiss, Town Engineer
----------------	--

2008 Site Plan Review

In 2008, 17 site plan reviews were conducted to insure that proper design plans were developed for erosion and sedimentation control and that the plans comply with the CTDEP's Guidelines for Soil Erosion and Sediment Control, 2002.

In 2008, site 15 plan reviews were also conducted in conjunction with the Town's Inland/Wetlands application process.

1 Notice of Violations with follow-up action were issued.

0 violations remaining.

Date: 10/4/2004	Responsible Party:
-----------------	--------------------

Draft P & Z Regulations

Completed draft of revised P & Z Regulations which included:

1. Updated current P & Z regs. requiring the implementation of proper erosion and sediment controls, and controls for other wastes, on applicable construction sites;
2. Updated current procedures for site plan review of construction plans that consider potential water quality impacts;
3. Updated procedures for site inspection and enforcement of control measures;
4. Included sanctions to ensure compliance (established in the P & Z Regs.);
5. Evaluated procedures for the receipt and consideration of information submitted by the public; and
6. Considered the appropriate best management practices (BMPs) and measurable goals for this minimum control measure.

Date: 1/1/2004	Responsible Party: Carol Zebb, Town Planner
----------------	---

Site Plan Review

Conducted 19 site plan reviews to insure that proper design plans were developed for erosion and sedimentation control and that the plans comply with the CTDEP's Guidelines for Soil Erosion and Sediment Control, 2002.

19 plan reviews were also conducted in conjunction with the Town's Inland/Wetlands application process.

Staff Training

BMP Description:

Train staff in finalized inspection procedures developed in year - 1 goal, 'Information Management System'.

Has Goal Been Accomplished: YES

Work Performed

Date: 1/3/2005

Responsible Party: Fran Merola, Director of Public Works

2005 Staff Training

In 2005, a system for tracking information submitted by the public and to record staff inspections of construction sites was implemented.

Site inspection procedures developed in 2004 are now used by staff in the performance of construction site inspections.

2 Engineering Department staff members attended an Asist training session and 1 staff member attended 2 MS4 training sessions.

The Town Planner attended an Inlands Wetlands seminar.

Date: 1/2/2006

Responsible Party: Karl Kilduff, Town Manager

2006 Staff Training

In 2006, Asist software was used by staff to schedule and perform inspections, maintenance activities and document any other actions taken on these inventory items.

Date: 1/2/2007

Responsible Party: Karl Kilduff, Town Manager

2007 Staff Training

In 2007, 14 members of the DPW staff attended a training session on Ice Ban salt additive.

In addition, Engineering staff attended seminars on Geosynthetic Best Management Practices and CASHO seminar on Stormwater Phase 2.

Date: 1/1/2008

Responsible Party: Richard Branigan, Town Manager

2008 Staff Training

In 2008, 14 members of the DPW staff attended a training session on Ice Ban salt additive.

2 members of the Engineering Department attended a Stormwater Phase II update meeting.

Post-Construction Runoff Control

Descriptive Text:

The Phase II Final Rule requires an operator of a regulated small MS4 to develop, implement, and enforce a program to reduce pollutants in post-construction runoff to their MS4 from new development and redevelopment projects that result in the land disturbance of greater than or equal to 1 acre. The small MS4 operator is required to:

1. Develop and implement strategies which include a combination of structural and/or non-structural best management practices (BMPs);
2. Have an ordinance or other regulatory mechanism requiring the implementation of post-construction runoff controls to the extent allowable under State, Tribal or local law,
3. Ensure adequate long-term operation and maintenance of controls;
4. Determine the appropriate best management practices (BMPs) and measurable goals for this minimum control measure.

Post-construction storm water management in areas undergoing new development or redevelopment is necessary because runoff from these areas has been shown to significantly effect receiving waterbodies. Many studies indicate that prior planning and design for the minimization of pollutants in post-construction storm water discharges is the most cost-effective approach to storm water quality management.

There are generally two forms of substantial impacts of post-construction runoff. The first is caused by an increase in the type and quantity of pollutants in storm water runoff. As runoff flows over areas altered by development, it picks up harmful sediment and chemicals such as oil and grease, pesticides, heavy metals, and nutrients (e.g., nitrogen and phosphorus). These pollutants often become suspended in runoff and are carried to receiving waters, such as lakes, ponds, and streams. Once deposited, these pollutants can enter the food chain through small aquatic life, eventually entering the tissues of fish and humans. The second kind of post-construction runoff impact occurs by increasing the quantity of water delivered to the waterbody during storms. Increased impervious surfaces interrupt the natural cycle of gradual percolation of water through vegetation and soil. Instead, water is collected from surfaces such as asphalt and concrete and routed to drainage systems where large volumes of runoff quickly flow to the nearest receiving water. The effects of this process include streambank scouring and downstream flooding, which often lead to a loss of aquatic life and damage to property.
